Director, Training Institute for Suicide Assessment &
Clinical Interviewing (TISA), Newbury, New Hampshire,
USA

ISBN: 9781437716986

876 pages

Publication Date: October 2016

Print + eBook List Price: \$89.99

APA Meeting Price*: \$71.99

"This edition retains all the elements responsible for the success of the earlier editions, yet is significantly expanded with ample new material in the print version, additional online material, and videos. This remains one of the premier books on the psychiatric interview."

Doody's Book Review Score: 97/100 - 5 Stars!

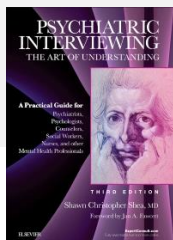

Marina Bayeva, M.D., Ph.D.

Northwestern University

Feinberg School of Medicine

"Enormously practical, elegant in execution and delightfully fun to read, every page holds clinical wisdom . . . I can think of no better first book for any trainee in mental health, for it is not only, in my opinion, an unsurpassed book about how to interview, it is a book about why we interview. It is a book that captures the wonderment of our work and the soul of our mission. . . . I have never seen such great teaching videos on eliciting suicidal ideation. They are a treasure, and I believe that many lives will be saved by those lucky enough to view them."

From the Foreword by Jan Fawcett, M.D.
Professor of Psychiatry, University of New Mexico
Recipient of Lifetime Achievement Awards
from both the American Association of Suicidology
and the American Foundation for Suicide Prevention

New and Expanded Content:

- **Expert Consult eBook version included with purchase.** This enhanced eBook experience allows you to search all of the text, figures, references, and videos from the book on a variety of devices
- Bonus chapter on **advanced aspects of cross-cultural interviewing**, including approaches for recognizing clinician biases and exploring the client's spirituality and framework for meaning
- Bonus chapter on **motivational interviewing**
- Bonus chapter on **transforming patient anger** and moments of potential disengagement
- Bonus chapter for prescribing clinicians -- such as psychiatrists and psychiatric nurse clinicians -- on how to **collaboratively talk with patients** about their medications
- Includes **over 7.5 hours of video illustration and instruction**
- Brings to life the pain and phenomenology of people coping with severe mental illnesses, such as **schizophrenia, bipolar disorder, and major depressive disorder**
- An entire chapter on engaging patients with difficult personality disorders, such as **borderline personality disorder and narcissistic personality disorder**
- A new and unique chapter covering often overlooked areas, such as **positive psychology and methods for uncovering client wellness and strengths**
- Extensive chapter on **nonverbal communication**, including the complex challenges related to interviewing on the web by text and/or tele-psychiatry
- A comprehensive **introduction to faciliics** (an innovative supervision system for helping clinicians learn how to transform interviews into naturalistically flowing conversations), **including an interactive web-based self-learning module on faciliic supervision schematics for both faculty and students**
- Practical tips for **creating a good EHR/write-up**, in addition to sample clinical forms for EHR/written documentation
- A **specialized appendix for faculty**, which includes four complete articles from the *Psychiatric Clinics of North America* that address educational topics including: effectively designing interviewing training courses and macrotraining suicide assessment skills
