The Honorable Catherine Cortez Masto 520 Hart Senate Office Building Washington, DC 20510

The Honorable John Cornyn 517 Hart Senate Office Building Washington, DC 20510

The Mental Health Liaison Group (MHLG), a coalition of national organizations representing consumers, family members, mental health and addiction providers, advocates and other stakeholders, is writing to express our strong support for S. 1378, the Connecting Our Medical Providers with Links to Expand Tailored and Effective (COMPLETE) Care Act. By incentivizing primary care to adopt and implement integrated care models, your important legislation would improve access to timely and effective behavioral health care treatment.

Families across the country are struggling to access needed mental health and substance use disorder services. Ongoing workforce shortages and a lack of care coordination all impede patient access. The COMPLETE Care Act would address these issues by helping clinicians and practices adopt innovative integrated delivery models such as the Primary Care Behavioral Health Model and Collaborative Care Model. By facilitating coordinated care between health professionals, in the primary care setting, these team-based models have the capacity to increase access, reduce wait times for treatments, improve patient outcomes, and reduce overall treatment costs.

The uptake of these innovative models by primary care practices remains low due to the up-front costs associated with implementation. By providing temporarily enhanced Medicare payment rates for behavioral health integration services, as well as technical assistance and quality measures, your legislation would help to address these issues. The COMPLETE Care Act is a logical and much needed step toward ensuring integrated behavioral health care is more widely implemented, and patients can get the mental health and substance use care they require.

We look forward to working with you to advance this important legislation and improve outcomes for our patients.

Sincerely,
